THE CLIFF DWELLINGS.

THE ALAMO RANCH at Mancos, Colorado, is the headquarters from which trips are made to the Cliff Dwellers' Ruins in Colorado and New Mexico.

MESSRS. WETHERILL & SONS, who are the most noted authorities and explorers of these ancient dwellings, have offered League Members very favorable rates which are given below:

TO CLIFF PALACE, SPRUCE TREE AND BALCONY HOUSES AND RETURN, REGULAR RATE $15.
LEAGUE MEMBERS ONE EXTRA DAY.

TO CHACO CANON, N. M., REGULAR RATE $56.
LEAGUE MEMBERS 10 PER CT. OFF.

TO MT. ELMO AND RUIN CANONS, REGULAR RATE. $30.
LEAGUE MEMBERS 15 PER CT. OFF.

MANCOS CANON (SANDAL HOUSE) ONE DAY'S TRIP.
LEAGUE MEMBERS, $7.

BOARD AT ALAMO RANCH, REGULAR RATE, $1 TO $2.
LEAGUE MEMBERS 25 PER CT. OFF.

WETHERILL & SONS furnish all horses, camping outfit, food, guides, etc., for the various trips.

SECOND OFFICIAL

ROAD BOOK

OF THE

COLORADO DIVISION,

League of American Wheelmen

COMPILED BY

W. E. PERKINS,

Chairman of the Road Book Committee

DURING

1895, 1896 and 1897.

PREFACE.

The labor of gathering the information contained in the Second Official Road Book of the Colorado Division has covered a period of twelve years, and the man whose name has been placed upon its title page has been the one constant factor in the work.

Walter Edgar Perkins was born in Louisville, Kentucky, and moved to Denver in 1885. During the same year he began to ride the "good old ordinary" and became a member of the Colorado Wheel Club. When the Ramblers' Wheel Club was organized in 1886, Mr. Perkins was one of its charter members. He has served as Captain, Treasurer, President, and in nearly every other office in the gift of that Club, and still retains his membership and active interest in its affairs. As a touring wheelman Mr. Perkins has no equal in the State, as no trip is too difficult for him to attempt. His experience would fill a book with fascinating stories of the pleasures and troubles of a wheelman. From the time when he was lassooed by "cow punchers" near Deer Creek, in 1890, to his ride down the Pike's Peak Cog Road on his wheel in 1896, he has been the modest hero of many thrilling trips.

As soon as Mr. Perkins began to ride he commenced taking notes of the roads which he traveled, and one has but to look through his pile of note-books to see how thorough and untiring he has been in this work, which has now proven so valuable to us. In 1890 Kennedy and Perkins were appointed by the Ramblers as a committee to compile a road-book of Colorado. Information blanks were printed and some data was gathered, but the task proved too great for the club and no book was published. Perkins preserved the blanks and many of them have been used in preparing the present volume.

Early in 1895, W. E. Perkins, Sid. M. Culbertson and the writer were appointed as a road-book com-

mittee by the then Chief Consul, J. A. McGuire. A large amount of data was gathered by correspondence with members all over the State, but where one man did his best to furnish the information asked of him, there were ten who never even answered our letters. The available appropriation for printing was small, and the resultant book was meager and disappointing.

The present Road Book is not final, and our members are requested to send additional information and corrections to the Road Book Committee, in care of the Secretary-Treasurer of this Division.

Whatever success the present edition attains and whatever of value it proves to our members, is due almost wholly to the work of W. E. Perkins. I know that there is only one man in the State who will accuse me of saying too much on this point, and that one is Mr. Perkins himself.

Yours in earnest,

CHARLES WILMOTT DAWSON,
Chief Consul (*1897*).

KEY

To Signs and Abbreviations.

GRADES.

Referring to general grade between two points:

L denotes a LEVEL grade.

U denotes an UP grade.

D denotes a DOWN grade.

U and D denote a grade first UP AND THEN DOWN.

Referring to the character of grades:

E denotes an EASY grade.

H denotes a HEAVY grade, ridable under fair conditions.

S denotes a STEEP grade, where it is necessary to walk all or part of the way in going up, and is ridable only with a good brake in going down.

R denotes a ROLLING grade.

QUALITY.

Referring to chief material of which the road consists:

F denotes a FIRM, solid, gravelly road not much affected by rain or snow.

S denotes SAND.

C denotes CLAY.

D denotes DIRT or loamy soil.

B denotes BOULDERS or loose stones.

T denotes railroad TIES.

Referring to the ordinary condition of roads:

1 denotes FINE, and is used only for the very best roads.

2 denotes GOOD, and easily ridable.

3 denotes FAIR, and practically ridable.

4 denotes POOR, where riding can only be accomplished with difficulty.

5 denotes VERY POOR, and usually unridable.

FORKS, CROSS-ROADS AND CORNERS.

In the various signs used throughout the book to denote forks, cross-roads, corners, and the like, the heavy line shows the route and the lighter line shows the branch road. The direction, to the right or left, in which the route leaves the point of intersection is indicated by an arrow-head, but the signs are used without reference to the points of the compass.

ADDITIONAL DATA REGARDING ROUTES.

Routes 1 and 16.

Between Omaha, or northern Missouri River points, and Denver the Julesburg route will be found the best. Use Route 1 between Julesburg and Evans, and Route 16 between Evans and Denver.

Routes 2 and 3.

Between Kansas City and Colorado there are two routes, known as the Smoky Hill Trail and the Santa Fe Trail. The former follows the Kansas Pacific Division of the Union Pacific Railway, coming into Colorado at Cheyenne Wells. Thence Route 2 reaches Limon and Denver, and Route 2-A branches off at Limon to reach Colorado Springs. The Santa Fe Trail is followed by Route 3 from Coolidge, Kansas, to Pueblo, along the Arkansas River. These trails are old wagon-roads which have been in use for the past fifty years.

Route 4.

Leave Denver via Larimer street or Colfax avenue. Seven and one-half miles west of Mt. Vernon the right hand fork leads over the lower road joining the upper road again at the top of Floyd Hill. The lower road is 2¼ miles the shorter but it is more rolling. Ten miles west of Mt. Vernon, on the upper road, is Bergen's Park. The left hand fork leads south 5 miles to Evergreen. One-half mile west of this fork is Creswell P. O. The old road shown on map to Evergreen is incorrect.

Route 5.

West on Colfax avenue and thence south to Barnum, 3¼; Blacksmith shop, 4½; Morrison, 7½. This is 1½ miles shorter than the old road via Hendricks' Ranch, shown in Route 5, and avoids the long hill.

From Fairplay to Leadville, over Mosquito Pass, is a hard trip. An easier but longer route is via Routes 5-C and 6-B over Weston Pass, and by Route 11 into Leadville.

From Gypsum to Glenwood use the railroad tracks through the Canon of the Grand. The Cottonwood Pass Route is very poor.

Route 6.

This route over Hill Top to Buena Vista is an easy pass. Cottonwood Pass going up, west bound,

is comparatively easy, but almost impassable for the first two miles down the west slope. Eating points are very scarce between Buena Vista and Gunnison.

The road over Independence Pass, between Leadville and Aspen, is kept in good condition by the counties through which it passes.

Route 7.

It is almost necessary to use the railroad tracks through the Royal Gorge between Canon City and Coaldale. Route 7-A is given to show that a wagon road exists, but it is a very poor route for wheelmen. The same applies over Marshall Pass, from Salida to Sargent, and through the Black Canon from Sapinero to Cimarron. For a variation of the latter, use Route 21, Iola to Dayton; thence northwest to Cimarron.

Route 8.

Veta and Middle Creek Passes are both easy. Alamosa Canon, west of Cockrell, offers a beautiful ride. Alamosa Pass is difficult for about three miles each side of the summit.

Route 8-B over the Conejos is a toll road and very poor from Cumbres to Chama. It is a disgrace to the county.

Route 9.

South on Broadway out of Denver for from 5 to 7 miles; thence ¼ to ½ west, and thence south.

From Colorado Springs follow car line south through Ivywild; thence southwest to cross-roads east of Broadmoor; thence south.

Route 10.

This is a pleasant diversion to Colorado Springs, being 4 miles farther than Route 9. South on Broadway to Bayaud street; thence east and southeast. Portions of 10-A are little used between Elizabeth and Parker. A better road is Route 10 to Franktown; thence 8 miles east to Elizabeth. From Eastonville to Colorado Springs 2-A is much preferable.

Route 11.

Fremont Pass, between Dillon and Leadville, is a fair pass but can be avoided by taking the train. From Salida to Villa Grove there is good wheeling, except between Poncha and Mears Junction, where the railroad tracks are recommended. From Saguache to Monte Vista is the famous "Gun Barrel Road" of the San Luis Valley. Southeast of Monte Vista there may be some errors in the road book.

Route 12.

This route is only difficult between Rico and Ames.

Route 13.

Use Route 9 to Littleton, and railroad tracks in the Platte Canon to Symes.

Route 14.

Does not show new road to Steamboat Springs, built by Larimer county *through* North Park.

Route 16.

Leave Denver northeast on Larimer street and north from U. P. Hospital. The better route to Cheyenne is from Carr, west two miles; thence on Route 16-B.

Route 17.

Argentine Pass is a very hard pass for cycling. Also Hoosier Pass, south of Dillon.

Route 20.

This is one of the grandest routes in the state for scenery, and is a practicable wheel road. It forms part of the famous "Round the Circle" trip. The Bear Creek Falls, Ouray Toll Road and the Box Canon at Ouray are all well worth a long trip to see.

Route 20-A is given merely to show that it is possible to get a wheel across from Ouray Toll Road to Animas Forks. Poughkeepsie Gulch has an old road practically abandoned. The trail up to Mineral Point is very difficult.

Route 21.

This route is out of the usual course. It is practicable for wheeling most of the way. The passes south of Lake City are very high.

Route 21-A is very good as far west as San Juan. Beyond this the region is unsettled and wheeling is very difficult.

THE CARD SUPPLEMENT.

On the inside of the cover of this book will be found a removable card supplement. These cards will be issued at least twice a year, and will contain the latest information regarding Division Officers, Local Consuls, League Hotels, Bath Houses and Repair Shops.

Division Officers.

The addresses of the various Division Officers are given. Please send all applications to the Secretary-

Treasurer, and all renewals either to him or to the National Secretary, Abbot Bassett, 12 Pearl street, Boston, Mass.

Local Consuls.

The office of Local Consul should be one of great importance to the welfare of our members. Local Consuls are expected to recruit the membership, to watch the interests of the members in their localities, reporting to the officer in charge of their district all violations of wheelmen's rights, all needed laws and ordinances, and all valuable wheeling data which they may discover. They are expected to welcome visiting members who may call upon them; to give such members introductions, information and such needful assistance as is in their power. They should have constantly at heart the welfare of the division, and should they lose interest in their work they should immediately resign.

We want Local Consuls in every town in the state. If none is already appointed at any place where there is a League member willing to serve, we ask that he tender his services to the Chief Consul.

League Hotels.

Members are requested to patronize the League Hotels in preference to others and to always show their membership cards on settling their bills. In this way they will secure the benefits of the reductions which have been made, and will show the proprietors that they too are benefited by their concessions to us.

League Bath Houses.

We have at present a few good Bath Houses where reductions are made to members. In patronizing them the members should be sure to show their cards.

League Repair Shops.

This is a new feature (in 1897) and one that we hope to extend. Upon presentation of the membership cards, members are entitled to a reduction in charges for repair work.

Proprietors of Hotels, Baths and Repair Shops.

Information regarding the contracts with League Hotels, Baths and Repair Shops may be obtained by the proprietors of the same, on application to the Chief Consul at the address given in the card supplement.

CHARLES WILMOTT DAWSON,
Chief Consul, 1897.
